After graduating Magna Cum Laude and receiving her MD from UTMB in Galveston, Dr. Donna Rich served as a resident at the UT Health Science Center in general surgery. It was here where Dr. Rich began training in plastic surgery. Certified by the American Board of Plastic Surgery, she now has a solo private practice located in Clear Lake. She has a brand new office and state of the art surgical center, now making surgery more private and affordable.

Dr. Rich, as one of the few female plastic surgeons practicing in Houston, is able to bring a unique female perspective to the cosmetic surgery process to accompany her solid credentials. By understanding the needs and concerns of the female body, Dr. Rich is able to understand the expectation of her female patients.

"I feel that all patients should feel completely comfortable

with their plastic surgeon," Dr. Rich says. "I strive to make all patient encounters pleasant but professional. The more informed a patient is about a procedure, the happier the patient will be with the results."

Some of the cosmetic procedures she performs include: cosmetic surgery of the face and eyelids; liposuction and body contouring; breast augmentation, reduction and lifting; and non-operative facial rejuvenation including laser procedures, Botox and injection filler treatments such as Radiesse, Juvederm and Restylane.

Dr. Rich finds and her staff welcome you to their new and exciting office and surgical center. We also have a full skin care clinic and offer permanent make-up for total skin care and rejuvenation.
